# handmade touches using *custom shapes*

**I**t's easy to add custom shaped elements to your pages with the Custom Shape Tool in Photoshop Elements. Shaped die-cut papers, journaling spots and layered embellishments are all the rage lately, and you can create your own at home using your computer and printer. Check out the following pages and be inspired to create your own accents. There's no better way to save time and money!

use your  
*computer*  
to create shaped  
elements

**MY DAUGHTER ELLIE** is quite the chatterbox. She constantly talks, asks questions and shares loving sentiments that make our whole family smile. To highlight some of the phrases she repeats often, I selected a talk-bubble shape in Photoshop Elements and printed multiple sizes onto white cardstock. Repeating the shape provides a quick way to add inexpensive, instant impact to any page.

BY LORI ANDERSON

**She Says** by Lori Anderson. **Supplies:** Software: Adobe Photoshop Elements 7.0; Cardstock: Bazzill Basics Paper (white) and 5811 (blue); Patterned paper and rub-on: Heidi Grace Designs and Fiskars Americas; Chipboard: Anna Griffin (ottobers) and Fiskars Americas (Jabel); Ribbon, circle lip accent and pen: American Crafts; Clip: KI Memorias; Faux: Tahome; Adhesive: Mono Adhesive, Tombow; Scrapbook Adhesives by 3L; Foam Squares, Therm O Web.
